1 Executive Summary

Dape Club is a revolutionary memecoin that aims to empower users through a fair and decentralized mining system accessible via a mobile app. With 99% of the total token supply locked for community mining, without presales or private allocations, Dape Club is built with the vision of creating a community-driven currency backed by clear and transparent incentives.

2 Introduction

In the current ecosystem, most memecoins are launched without utility or transparency, often created on platforms like pump.fun or bonk.fun, designed for rapid speculation or even rugpulls. While they typically lack presales, they remain centralized, controlled by a single wallet or creator with no real commitment to the community.

Dape Club offers an alternative: a memecoin where 99% of the supply is locked for progressive and decentralized mining by users through a free app. With no private investments, no presales, and a genuine focus on rewarding early supporters, Dape Club stands out.

3 The Problem

- Many memecoins lack transparency, utility, or fair distribution.
- Projects are often designed for short-term speculation.
- Traditional mining requires technical knowledge and specialized hardware.

4 Our Solution

Dape Club proposes a transparent and accessible alternative to the current wave of opaque and centralized memecoins. Our solution focuses on empowering the community through:

- **Fair distribution:** 99% of the total supply is locked in a smart contract and can only be obtained through app-based mining, avoiding presales, VCs, or internal allocations.
- **Global accessibility:** Anyone with an Android phone can mine \$DAPE via the app, without requiring technical knowledge or investment.
- **Holder rewards:** An automated system redistributes 0.5% of each transaction to active holders, incentivizing loyalty and holding.
- **Deflationary model:** 0.25% of each transaction is used to buy back and burn tokens, reducing the supply over time.

5 Mining Model

Mining is available for free through the app, with the following features:

- **Manual session-based mining:** Users must activate mining each time.
- **Boosts:** Available up to 100 times per day (reset with each session).
- **Additional rewards:**
 - *Active referrals:* +0.005 \$DAPE/hour for both parties.

- *Ads enabled*: Doubles the mining speed.
- *VIP membership*: +30% permanent mining boost.

6 Tokenomics

The following table summarizes the key parameters of the \$DAPE token:

Parameter	Detail
Token Name	DAPE
Ticker	\$DAPE
Total Supply	1,000,000,000
Distribution	99% mining (990M) / 1% launch (10M)
Utility	Memecoin with no defined technical utility. Focused on rewards, community, and collective growth.
Token Contract	Not yet published

Table 1: Tokenomics Summary

7 VIP System

- **Cost**: 50,000 \$DAPEVIP per ticket.
- **Limit**: 20,000 VIP users.
- **Benefit**: +30% permanent mining speed boost.
- **Token used**: \$DAPEVIP (burned upon use).
- **Solana Contract**: [Dj8L4mSQiSfZ7MwVK4bBv4QwNXqVYroqGPCqqvrGbonk](#)

8 Rewards and Fees

Each buy or sell transaction incurs a 1% fee, distributed as follows:

Destination	Percentage	Use
Holder Rewards	0.5%	Redistributed to active holders (On-Chain only)
Network and Operational Costs	0.25%	Servers, maintenance, support
Buyback & Burn	0.25%	Token buyback and burn to reduce supply

Table 2: Fee Distribution

Note: Holder rewards only apply when tokens are held in an On-Chain wallet (e.g., Phantom, Backpack). Tokens held in the app do not qualify for rewards.

9 Technology

- **Blockchain**: Solana
- **Smart Contract**: Mining supply is locked.

- **Mobile App:** Available on Google Play Store for Android.
- **Backend:** Continuously improved for scalability and stability.

10 Roadmap

Phase	Objectives
Phase 1	Launch of the app on Google Play Store
Phase 2	Mining system, boosts, and referral program activated
• Phase 3	Integration of VIP system and official website development
→ Phase 4	Minting of NFTs with rarities and ecosystem utility
→ Phase 5	Official token launch and liquidity opening
→ Phase 6	Holder rewards and exchange listings
→ Phase 7	Community expansion, DAO integration, partnerships

12 Frequently Asked Questions

What is Dape Club?

A 100% community-minable memecoin via a free mobile app.

How do I start mining?

Download the app, activate mining sessions, and use boosts to increase rewards.

What is the token's utility?

No defined technical utility. It is a memecoin focused on rewards and community engagement.

What is the DAPE token address?

Not yet published. The only active contract is for \$DAPEVIP.

How do holder rewards work?

Rewards apply only to On-Chain wallets (e.g., Phantom). Tokens held in the app do not generate rewards.
